

# THE BROCHURE: LET'S FOLD IT

Exterior

You'll start with two sheets of printed material; an exterior and interior.

Exterior

Flip the exterior page over. Use glue, double stick tape, or even a stapler to adhere the two pages together.

Now let's start folding. Fold the right-most panel in. You'll be able to see where you should fold based on the darker area that separates the columns.

Keep on folding...

...and onto the last fold.

Back

Front

If the left-hand image is on one side and the right-hand image is on the other, you've succeeded in folding the brochure. *Thanks!*
